

## Cat® Reman Hydraulic Components

Every Cat Reman pump and motor is thoroughly tested and updated to ensure the highest quality and performance.

- Deliver the same performance and life as new Caterpillar components
- Are backed with same as new parts warranty
- Stock the broadest line of remanufactured hydraulic components in the industry
- Are a fraction of new price usually 30-70% of new components

# Cat Reman Hydraulic Components

## *The difference is in the details*

### Reman hydraulic cylinders and rods

- All tubes, rods, and other components are fully remanufactured to Cat specifications or replaced with new Cat parts.
- All rods are induction-hardened, improving resistance to nicks and dents and extending seal life.
- Most rods feature inertia-welded eyes for superior strength.
- All required new bearings are installed.

### Reman hydraulic pumps, motors, and components

- All returned units are disassembled and thoroughly cleaned and inspected.
- Port plates are reconditioned and updated to the latest designs; or replaced with new parts.
- Piston slippers and pistons are reconditioned or replaced.
- Barrel assembly faces are remachined and bushings are replaced and machined to new specifications.
- Vane pump rotors and cams are remanufactured to Cat specifications or replaced with new components.
- Vanes are all replaced with new components.
- All cartridges, pumps, and motors are adjusted and tested to ensure like-new performance.

## *Core exchanges help reduce your costs*

The price of your Cat Reman hydraulic component is based on the condition of your used component—so the better the condition of your core, the more you save. Because Cat hydraulic components are designed to be remanufactured, we can often award credit even when you think a component has no value left. That means the price you pay for Cat Reman cylinders, rods, pumps, and motors is always less than that of new parts—usually 30-70% of the price.

## *Coverage charts*

Refer to the following charts to find the components available. However, please check with us (your local Cat dealer) for the latest information, as we are continually expanding coverage.

Cat Reman hydraulic products offer same-as-new quality at fraction-of-new prices.
